AI in Oncology Summit 2021

The virtual summit on the use of AI technology in Oncology

The AI in Oncology Summit will be focusing on the practical application and potential use of Artificial Intelligence (AI) in the therapeutic area of oncology. AI can provide a competitive edge by preserving and enhancing the value of the R&D pipeline through AI-based approaches. The summit will be held in a digital format and will explore how companies could improve their clinical development performance even in times of unprecedented challenges related to COVID-19.

Speaker

Juergen Scheele
